3. Background

- 3.1 Scotland Excel established a Framework Agreement for the Treatment of Recyclable and Residual Waste in July 2014 (the “Framework”) and which expires on 31 May 2018. The Framework offers a suite of compliant treatment options for a host of waste materials commonly collected by Councils’ via their existing individual collection services, including metals, cans, glass, paper, textiles, plastics and wood. Furthermore, options are included for the treatment and disposal of the material remaining when all other possible reusable or recyclable material has been removed, commonly referred to as “residual” waste.
- 3.2 There are a number of operating factors which have impacted on the recyclable waste market including global market prices for recyclate materials and the quality of items such as paper, glass, metals and plastic has meant that materials recycling facilities have to charge more to process materials.
- 3.3 In accordance with Standing Order relating to Contracts 29.5, The HOPAC has identified that the Framework provides a suitable route to market and provides a facility to make direct awards where best value can be demonstrated. The Council considered the current Framework rates of Providers under Lot 3 and a subsequent desktop analysis carried out by procurement officers within the Council demonstrated that best value could be achieved by entering into a direct award contract with William Tracey Limited for the length of contract as described in section 2.3.
- 3.4 William Tracey Limited have committed to delivery of the following community benefits under this Contract:

- Provide financial support for various community groups throughout Renfrewshire and continue to support the Renfrewshire Council staff recognition awards and;
- Provision of one work experience placement via the local job centre per year of the contract.
