To: Joint Committee

On: 11 December 2020

Report by: Chief Executive of Scotland Excel

Strategic Risk Register Update

1. Introduction

This report provides an update on the Strategic Risk Register which is maintained to assess threats/risks that could impact on the delivery of Scotland Excel's organisational objectives and to identify controls and actions that are being taken to mitigate these risks.

2. Background

The attached Strategic Risk Register was created in June 2018 when Scotland Excel carried out a full review of the organisation's Risk Register to reflect the new 5-year operating plan. It was agreed that the risk management plan would be reported to the Executive Sub Committee twice a year and the Joint Committee on an annual basis to give elected members visibility of the risks, and actions being taken by the organisation to manage and mitigate these risks.

In June 2019, the Strategic Risk Register template used by Scotland Excel was adjusted to better reflect that used by partner organisations. The revised template plus additional information which is now in use can be seen within the document at Appendix 1 of this report.

3. Risk Management update

The Strategic Risk Register is maintained and continues to be a focus for the ongoing operations of the organisation. A process of regular review meetings is in place involving the entire Senior Management Team (SMT). These meetings are held quarterly to review, revise and update the register. Actions being undertaken in mitigation of the risks are on-going throughout the year.

Currently there are 10 risks identified within the Strategic Risk Register ranging in assessed risk score from 6 to 20. A summary of key statistics in relation to each identified risk is shown in Appendix 1 to this report.

The impact of the COVID-19 pandemic is the over-riding influence on all strategic risk at present coupled with continuing Brexit uncertainty. These factors are reflected in the upwards trend in relation to risk scores showing against a number of the existing strategic risks and in the introduction of a new risk in respect of, "National Emergency including Pandemic" (SXL-010-20/21) in April 2020.

The updated Strategic Risk Register identifies a number of existing and new linked actions in relation to each strategic risk aimed at mitigating the impact of each risk in the present day and going forward.

The new "National Emergency including Pandemic" risk is currently positioned on residual risk score of 20 (Likelihood 5, Impact 4). While Scotland Excel is operating well within the home working environment, the continuing uncertainty of when and how the pandemic is going to end and the economic uncertainty being caused necessitates this risk remaining at this level. A number of linked actions have been identified in relation to this risk aimed at mitigating the financial and operational impact on the organisation and making sure that the organisation learns from the current pandemic going forward.

Other risks with risk scores impacted by the COVID-19 pandemic are detailed on table 2 in the Strategic Risk Register at Appendix 1.

Factors taken into consideration, in addition to COVID-19, when reviewing the risk register over the year included Brexit; recruitment challenges within the procurement sector; continuing financial uncertainty across local government, social housing and the third sector; the developing importance of corporate social responsibility across the public sector; growing environmental awareness across society and the increasing size of the Scotland Excel contract portfolio.

Brexit, and the increasingly likely scenario of a no deal Brexit has had a significant impact on the Strategic Risk Register and in particular risk in relation to Supplier Failure. With a no deal scenario, suppliers on Scotland Excel frameworks may experience difficulties in sourcing materials, reduced export trade and higher costs which may impact their operational sustainability. Scotland Excel has actions in place to maintain contact with our suppliers to ensure we are kept aware of any difficulties being experienced.

Following quarterly review of these and other factors, the Scotland Excel Risk Register as at 5th November 2020 is shown in appendix 1.

4. Recommendation

Members are invited to provide any feedback on the risk register and the actions identified to manage risks.

Table 1 summarises risks identified within the Scotland Excel Risk Register and orders them according to their Residual Risk Score as at 5th November 2020. The Residual Risk Score represents the assessed risk score taking into consideration all risk controls and mitigations in place in relation to that specific risk on that date.

Table 1: Risk – Highest to Lowest Risk Score 05/11/20
