Minute of Meeting Scotland Excel Executive Sub-committee

Date	Time	Venue
Friday, 08 December 2023	09:30	Remotely by MS Teams,

Present

Councillor David Keating (Aberdeenshire Council); Councillor Brenda Durno (Angus Council); Councillor Kenny Macleod (Comhairle Nan Eilean Siar); Councillor Carlyne Wilson (Dumfries & Galloway Council); Councillor Altany Craik (Fife Council); Councillor Derek Loudon (Highland Council); Councillor Dennis Leask (Shetland Islands Council), Councillor Chris Cullen (South Ayrshire Council); and Councillor John Shaw (Renfrewshire Council).

Chair

Councillor Shaw, Convener, presided.

In Attendance

J Welsh, Chief Executive, H Carr, Director of Strategic Procurement, S Brannagan, Director of Customer & Business Services, L Campbell, Customer Services Manager, M Mitchell, Strategic Procurement Manager, K Forrest, Office Manager, J Clark, Senior Procurement Specialist, K Nugent, Project and Accounts Manager, L Mooney, Senior Communications Specialist, M Boyle, Senior Business Services Specialist and N Hyde, Programme Manager (all Scotland Excel); and C McCourt, Head of Finance & Procurement, L Mitchell, Managing Solicitor (Contracts & Conveyancing), A Burns, Corporate Finance Manager, D Blackburn, Principal Accountant, E Currie and E Gray, both Senior Committee Services Officers and T McGowan, Senior Accountancy Assistant (all Renfrewshire Council).

Apologies

Councillor Michael McPake (North Lanarkshire Council) and Councillor Walter Brogan (South Lanarkshire Council).

Declarations of Interest and Transparency Statements

There were no declarations of interest or transparency statements intimated prior to the commencement of the meeting.

1 Minute

There was submitted the Minute of the meeting of the Executive Sub-committee held on 17 November 2023.

DECIDED: That the Minute be approved.

2 Contract for Approval: Grounds and Plant Equipment

The Convener advised that the report by the Chief Executive of Scotland Excel relative to the award of a third-generation renewal framework for grounds and plant equipment was withdrawn from the agenda.

DECIDED: That it be noted that the report had been withdrawn.

3 Request for Associate Membership: Scottish Society for the Prevention of Cruelty to Animals

There was submitted a report by the Chief Executive of Scotland Excel advising that the Scottish Society for the Prevention of Cruelty to Animals had submitted an application to become an associate member of Scotland Excel.

The report provided details of the organisation and the legislative position in relation to the application.

DECIDED: That the application by the Scottish Society for the Prevention of Cruelty to Animals to become an associate member of Scotland Excel, with an annual membership fee of £1,100, be approved, subject to completion and signing of the agreement documentation.

4 Employee Supporting Attendance

There was submitted a report by the Chief Executive of Scotland Excel relative to supporting employee attendance, highlighting the absence rate in the organisation and the support mechanisms implemented to support staff members.

The report intimated that Scotland Excel worked to an absence rate of below 4% which aligned with partner organisations, supported good practice in this area and demonstrated the ongoing commitment to absence management as a key efficiency target.

The report advised of the absence levels for the 12-month period to October 2023 and provided a breakdown of the current month, the last six months and 12 months absence figures, together with an illustration of 12 months in days and percentages. Appendix 1 to the report detailed the rate of absence across the organisation, which had been maintained at below the 4% target, with one exception.

It was noted that, in addition to actively supporting members of staff absent through ill health, Scotland Excel continued to implement positive early intervention practices to maintain employee attendance; supported staff who might be experiencing difficulties whilst remaining at work; actively supported and encouraged positive mental health amongst staff members with 21 staff trained as accredited Mental Health First Aiders; and was implementing a programme of awareness and support for staff experiencing difficulties through menopause.

DECIDED: That the contents of the report be noted.

5 **Date of Next Meeting**

DECIDED: That it be noted that the next meeting of the Executive Sub-committee would be held remotely on MS teams at 9.30 am on 26 January 2024.

Scotland Excel

To: Executive Sub-Committee

On: 26 January 2024

**Joint Report by:
The Treasurer and the Chief Executive of Scotland Excel**

Revenue Budget Monitoring Report to 08 December 2023

1. Summary

- 1.1 At the end of Period 9, Scotland Excel is projecting a £35k underspend by year-end in its Core activities and an increase of £196k in Project Reserves. Further detail is provided at section 3.

2. Recommendations

- 2.1 It is recommended that Members note the report.

3. Background

Core

- 3.1 At 8 December 2023, the year-to-date net expenditure for Core activities was £0.496m, comprising gross expenditure of £3.118m, less gross income of £2.622m.
- 3.2 The current projection for the end of 2023/24 is a £35k underspend position for Core. Any underspend in the Core operating budget will be added to the General Revenue Reserve at the end of the financial year.
- 3.3 Scotland Excel will continue to control expenditure and focus on further development of its Income Strategy. Rebate income in particular, continues to grow towards anticipated levels, which will support financial sustainability.

Significant variances in relation to this year-end projection are as follows:

Employee Costs – £358k overspend

The approved budget for 2023/24 included an estimated pay award for 2023/24 of 3%. A pay award has now been agreed at approximately 6%, the full cost of which is reflected in the projected figures presented.

Movement in the projected Employee Costs since Period 6 relates to VR/VER costs, the successful filling of vacancies across the organisation, and maternity absences over the period.

Support Costs - £22k underspend

The underspend arises from a competitive tender process for Professional Indemnity Insurance renewal costs for 2023/24.

Income from Projects - £368k over-recovery

The forecast over-recovery in Income from Projects reflects income in relation to the Scotland Excel Supplier Awards event totalling £22k, and additional Rebate Income of £346k generated by Scotland Excel frameworks during 2022/23.

Rebate income generated from expenditure through Scotland Excel frameworks is confirmed and charged during the following year. An over-recovery of £113k for 2022/23 was previously advised during the external audit with the final 2022/23 accounts adjusted accordingly within Project reserves. However, a further over-recovery of £233k has now been identified and this has been reflected within this report. External Audit will be advised during the audit for the 2023/24 annual accounts.

- 3.4 Income and expenditure will continue to be monitored throughout the financial year and all projections and assumptions will be kept under review. Action will be taken where possible, to mitigate any projected adverse variances through prudent management of the workforce, close monitoring of sundry budgets and further exploration of existing and new income streams for the organisation.
- 3.5 Appendix 1 provides an analysis of the actual spend to date along with projected net expenditure for 2023/24 and includes a summary of movement in the Revenue Reserve, as well as a glossary of terms.

Projects

- 3.6 The year-to-date net expenditure for Projects is £312k, comprising gross expenditure of £966k, gross income of £685k and a Transfer to Core of £31k.
- 3.7 At the end of Period 9, the year-end forecast for Projects is a planned increase to Project Reserves of £196k. This is an increase of £22k compared to the approved budget position and follows an anticipated transfer to Core of £594k.

3.8 Significant variances in relation to the full-year projection are as follows:

Employee Costs - the projected spend within Projects includes provision for a higher pay award as detailed in 3.3 above. There have also been staffing changes within several projects including Scottish Government National Commissioning of Residential Services, South Lanarkshire Council and Flexible Procurement Services, which has increased the projected full year actual by £14k from Period 6.

Supplies and Services – the increase in projected spend reflects internal recharges for additional legal costs attributable to projects.

Third Party Payments – the year-to-date balance reflects the impact of accounting entries in relation to anticipated expenditure from 2022/23 for the New Build project (accrued). This figure will be cleared once corresponding transactions have been processed in the current financial year. The projected underspend relates to a lower level of New Build Framework activity than anticipated.

Income from Projects – the projected full year figure includes the additional £233k over recovery of Rebate income accrued during 2022/23 as detailed in 3.3 above, offset by a projected under-recovery across a range of Projects in 2023/24 including South Lanarkshire, New Build and Scottish Government.

3.9 Appendix 2 provides an analysis of the actual spend to date along with projected net expenditure for 2023/24 and includes a summary of movement in the Project reserves, as well as a glossary of terms.

REVENUE BUDGET MONITORING STATEMENT 2023/24
1 April to 08 December 2023

Scotland Excel

To: Executive Sub-Committee

On: 26 January 2024

**Report by:
Chief Executive of Scotland Excel**

Tender: Security Services and Cash Collection

Schedule: 2322

Period: Four years from the commencement date

1. Introduction and Background

This recommendation is for the award of the fourth-generation renewal framework for Security Services and Cash Collection.

The framework will provide a mechanism for councils to procure a range of security services including cash collections.

The framework will be for a period of 48 months as advertised in the published tender documents. Subject to approval and completion of a standstill period, the framework is intended to commence in February 2024.

This report summarises the outcome of the procurement process for this national framework agreement and presents recommendations for award.

2. Scope, Participation and Spend

As part of the strategy development and through consultation with the User Intelligence Group (UIG), the inclusion of four lots was endorsed as shown in Table 1. Tenderers could opt to offer for one, some or all councils. For evaluation purposes, the council areas were identified as regions, a breakdown of the region number and corresponding council/geographical area is below.

Region Number	Council/Geographical Area
1	Aberdeen City Council
2	Aberdeenshire Council
3	Angus Council
4	Argyll & Bute Council
5	City of Edinburgh Council
6	Clackmannanshire Council
7	Comhairle nan Eilean Siar
8	Dumfries & Galloway Council
9	Dundee City Council
10	East Ayrshire Council
11	East Dunbartonshire Council
12	East Lothian Council
13	East Renfrewshire Council
14	Falkirk Council
15	Fife Council
16	Glasgow City Council
17	Highland Council
18	Inverclyde Council
19	Midlothian Council
20	North Ayrshire Council
21	North Lanarkshire Council
22	Orkney Islands Council
23	Perth & Kinross Council
24	Renfrewshire Council
25	Scottish Borders Council
26	Shetland Islands Council
27	South Ayrshire Council
28	South Lanarkshire Council
29	Stirling Council
30	The Moray Council
31	West Dunbartonshire Council
32	West Lothian Council

As detailed in Appendix 1, 24 councils have confirmed their intention to participate in this framework, with all councils being named on the advertised contract notice. In addition, there are a significant number of associate members which will utilise this framework.

The framework was advertised at £17.5 million per annum, which totals to an estimated spend of £70 million over the 4-year lifetime of the framework. This advertised spend allows for increased participation from councils and associate members not currently utilising the framework.

Table 1: Framework Structure

Lot No.	Description	Estimated % Spend through lot
1	Guarding and Key Holding	93%
2	Event Stewarding and Taxi Marshalling	5%
3	Guarding, Key Holding, Event Stewarding and Taxi Marshalling	1%
4	Cash Collection	1%

3. Procurement Process

A Prior Information Notice (PIN) was published for this framework opportunity. This was published on 8 February 2023 which resulted in expressions of interest from 32 suppliers.

Thereafter, the Contract Notice was published via the Find a Tender and Public Contract Scotland (PCS) portal on the 22 September 2023, with the tender documentation being immediately available via the Public Contracts Scotland Tender (PCS-T) system. The Closing Date was extended by seven days to 30 October 2023 to allow tenderers to take account of a functional update to the tender documents. The tender exercise was conducted and concluded in accordance with the law and procedures currently in force.

The procurement exercise followed an open tender procedure to encourage maximum competition and participation.

The published tender documents anticipated the appointment to the framework of a range of tenderers with relevant and demonstrable experience and capabilities. There was no fixed number of tenderers to be awarded participation and no fixed score ensured success. The most economically advantageous tenderer or tenderers was to be identified following completion of the evaluation in accordance with the requirements set down within the tender documents. Awards would be sufficient to meet council requirements.

The tender followed a two-stage tendering procedure undertaken concurrently. Stage one, Qualification, was conducted using the Single Procurement Document (SPD). Within the SPD, tenderers were required to answer a set of exclusionary questions along with providing details and/or acknowledgement of insurance, financial standing, quality management, health and safety, and environmental management policies and/or procedures. In addition, to pass the Qualification stage tenderers had to confirm they held a Security Industry Authority (SIA) License. Scotland Excel validated these licenses with the SIA to ensure that all tenderers were accredited under the SIA Approved Contractor Scheme. A Serious Organised Crime (SOC) Procurement Check was also requested from Police Scotland.

At the second stage of the process, offers were evaluated against the criteria and weightings outlined in Table 2.

Table 2: Evaluation Criteria/Weighting

Award Criteria	Total Available Scores
Commercial Section	50
Technical Section	50

Tenderers were invited to bid on the following basis:

- In the Commercial Section tenderers were invited to offer either a national rate or a Council-specific rate for services for lots 1-3. For lot 4 tenderers were invited to submit pricing for a cash collection route in a central belt location for evaluation purposes.
- In the Technical Section, by answering technical questions, which were evaluated and scored as outlined in Table 3.

Table 3: Method Statement Scoring

Question	Scoring Methodology	Score			
		Lot 1 - All Council Areas	Lot 2 - All Council Areas	Lot 3 - All Council Areas	Lot 4 - All Council Areas
<u>Technical Questions - Maximum Score</u>		<u>50</u>	<u>50</u>	<u>50</u>	<u>50</u>
Community Benefits	Yes = 10 points; No = 0 points	10	10	10	10
Method Statement 1 - Service Delivery and Performance Response	five point scoring methodology	20	25	20	25
Method Statement 2 - Auditable Patrol (Lots 1 and 3 only)	five point scoring methodology	5	n/a	5	n/a
Method Statement 3 - Fair Work First	five point scoring methodology	15	15	15	15

Following a full evaluation of all submissions, scoring was completed in accordance with the published tender evaluation methodology, and a score was calculated for each tenderer.

4. Report on Offers Received

The tender documents were downloaded by 39 suppliers, with 21 tender responses received by the specified closing date and time.

Based on the criteria and scoring methodology set out in the tender documents, a full evaluation of offers received was completed. A summary of all the offers received and the scoring achieved by each tenderer is set out in Appendix 2.

5. Recommendations

Based on the evaluation undertaken, and in line with the advertised criteria and weightings summarised above, it is recommended that a multi-supplier framework arrangement is awarded to 19 suppliers as outlined in Appendix 2.

The 19 recommended suppliers offer best value and represent a mix of small, medium and large organisations.

The range of suppliers recommended provides coverage and competitive options for all participating bodies as well as offering a degree of choice and capacity.

The Executive Sub Committee is accordingly requested to approve the recommendation to award this framework as detailed within Appendix 2.

6. Benefits

Savings

This framework is recommended for approval with an overall saving of 0.1%.

It should be noted that the current framework contract is currently operating 10% under market conditions as detailed in Figure 1, indexation report.

Figure 1: Indexation Report

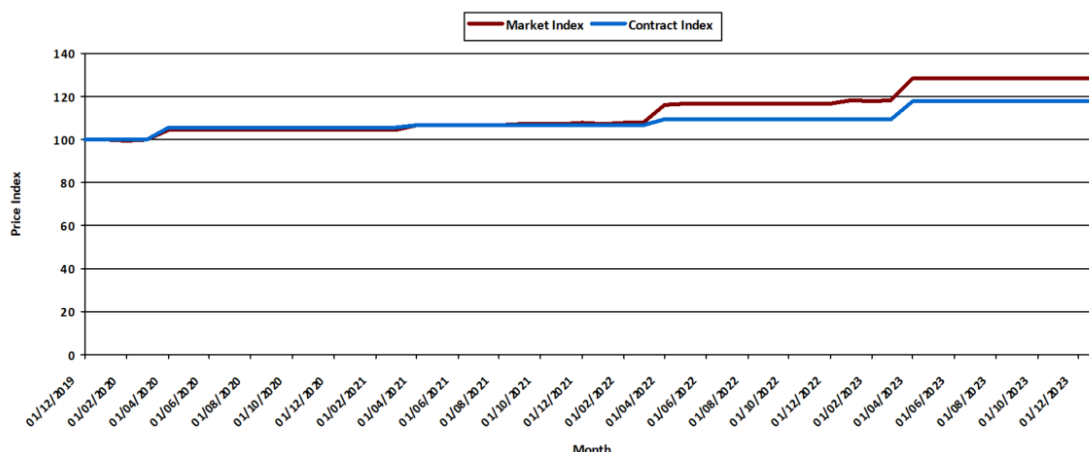

Figure 1: Indexation Report

These savings are summarised in Table 4 in accordance with the [Scottish Government procurement benefits reporting guidance](#).

Table 4: Savings Summary

Reference	Type	Reportable Outcome
BT1	Direct price-based savings	£15,754
BT2	Price versus market savings	10%
BT3	Process savings from use of collaborative arrangements	£288,000

Note: figures based on a forecast annual spend of £12.4million and should be viewed in this context.

Price Stability

All Suppliers' tendered rates will remain until 31st March 2024 and will then be fixed for 12 months. Any price increases will require to be supported with documentary evidence and will be validated against changes in market pricing, tracked in accordance with Scotland Excel's indexation model.

Rates influenced by the Real Living Wage (as set by the Living Wage Foundation) or National Living Wage (minimum wage) will be increased annually to reflect any changes to the National Living Wage and Real Living Wage. The terms differentiate between wage increases and operational costs will be subject to our established price variance procedure.

Security Industry Regulation

Scotland Excel has confirmed that all recommended suppliers have the relevant license under the SIA's Approved Contractor Scheme (ACS) to carry out the security services bid for under the framework. The ACS provides a recognised hallmark of quality within the private security industry. In addition to this, a Serious Organised Crime (SOC) Procurement Check has been completed with Police Scotland which confirmed there was no unspent convictions to raise.

Sustainable Procurement Benefits

Sustainability

The following sustainability benefits represent the Scottish Government reporting guidance for sustainability-based benefits (BT14).

Community Benefits

Scotland Excel is committed to maximising community benefits delivery for members. Suppliers were asked to commit to the delivery of community benefit initiatives, against pre-agreed spend thresholds outlined within the community benefits method statement. These aim to be reflective of the National Indicators outlined within the Scottish Government's National Performance framework, and their underlying vision and goals. Councils will accrue 'community benefit points' based on their level of spending with a supplier. These 'points' correlate to a negotiable benefit that the council can elect to receive at any given point throughout the lifetime of the framework.

All recommended suppliers have confirmed their acceptance of the community benefits approach. Scotland Excel will continue to engage with all appointed suppliers to drive maximum adoption and delivery of community benefits where appropriate.

Within the published tender documents, suppliers were given a list of indicative community benefits that could be agreed with councils. Examples of these are:

- Job for Long Term Unemployed (12 months+)
- Job for Unemployed
- Accredited Training to Employees
- Supply Chain Development
- Volunteering
- Work Experience Placement
- Sponsorship
- Donation
- Industry Awareness Day (Full Day)

Scotland Excel will monitor delivery of these commitments during the lifetime of the framework, and this will also be reported through ongoing contract management returns.

Fair Work First Including the Real Living Wage

Scotland Excel and its members are committed to the delivery of high-quality public services and recognise that this is dependent on a workforce that is well-rewarded, well-motivated, well-led, has access to appropriate opportunities for training and skills development, are diverse and is engaged in decision making.

Within the technical section of the tender, suppliers were assessed on their approach to Fair Work First and payment of the Real Living Wage to their workforce, as detailed in Appendix 2 – Scoring and Recommendations.

In the security industry, it is uncommon for suppliers of private security services to be accredited Living Wage employers as it is a low paid industry.

The Living Wage Foundation accredits Recognised Service Providers in the industry. Recognised Service Providers have committed to paying all directly employed members of staff, not tied to client contracts, the Real Living Wage. They have also committed to always offer a Real Living Wage bid alongside every market rate submittal to all prospective and current clients. Six recommended suppliers are Recognised Service Providers by the Living Wage Foundation. Please note that these suppliers have selected Option 7 as their response to the Living Wage question to the tender.

Of the 19 recommended suppliers, four pay the Real Living Wage. Of the four suppliers that pay the Real Living Wage:

- Two suppliers pay the Real Living Wage but are not accredited.
- One supplier is currently going through the process of becoming an accredited Living Wage Employer and commits to gaining accreditation over the initial two-year period of the Framework Contract
- One supplier commits to gaining accreditation over the initial two-year period of the Framework Contract

There are 15 suppliers who do not currently pay the Real Living Wage. Of the 15 suppliers:

- Four suppliers commit to gaining accreditation over the initial two-year period of the Framework Contract
- One supplier commits to paying the Real Living Wage to all employees within the first two years of the Framework Contract
- 10 suppliers do not currently pay the Real Living Wage to all employees, with six of these suppliers being Recognised Service Providers.

All tenderers have provided a Real Living Wage rate as part of their commercial offer for members that are accredited.

Scotland Excel will continue to monitor Fair Work First, including encouraging further uptake of the suppliers that are yet to commit to paying staff the Real Living Wage, during contract and supplier management activity.

7. Contract Mobilisation and Management

As part of the mobilisation process all successful suppliers will be invited to a contract mobilisation session to outline the operation of the framework, including roles and responsibilities, management information and community benefit commitments. Suppliers and participating members will be issued with a mobilisation pack containing all required details to utilise the framework.

In accordance with Scotland Excel's established contract segmentation tool, this framework is classified as class C. As such, it will require six monthly supplier contact, annual surveys and annual user group reviews as appropriate. During the current market conditions Scotland Excel will continue to engage with suppliers on a regular basis to ensure continuity of this essential service delivery for members.

8. Summary

This fourth-generation framework for Security Services and Cash Collection continues to maximise collaboration, promote added value, and deliver best value. A range of benefits can be reported in relation to, choice, regulation, price stability and community benefits.

The Executive Sub Committee is requested to approve the recommendation to award this framework agreement as detailed in Appendix 2.

Indexation – This column confirms the difference when the relevant market indices are compared with the relevant Contract indices derived from framework specific cost drivers.

Note: a key for Real Living Wage Status Reference and Descriptions is included below.

Key: Real Living Wage Status Reference and Descriptions

Real Living Wage Status Reference	Real Living Wage Status Description
1	I am an accredited Living Wage Employer and commit to maintaining this for the duration of the Framework Contract.
2	I am currently going through the process of becoming an accredited Living Wage Employer and commit to gaining accreditation over the initial two year period of the Framework Contract. I currently pay the Real Living Wage to all employees (except volunteers, apprentices and interns).
3	I am not an accredited Living Wage Employer but commit to gaining accreditation over the initial two year period of the Framework Contract. I currently pay the Real Living Wage to all employees (except volunteers, apprentices and interns) and commit to maintaining this until I have gained accreditation.
4	I am not an accredited Living Wage Employer but commit to gaining accreditation over the initial two year period of the Framework Contract. I do not currently pay the Real Living Wage to all employees.
5	I am not an accredited Living Wage Employer but pay the Real Living Wage to all employees (except volunteers, apprentices and interns) and commit to maintaining this for the duration of the Framework Contract.
6	I am not an accredited Living Wage Employer and do not currently pay the Real Living Wage to all employees but commit to paying the Real Living Wage to all employees (except volunteers, apprentices and interns) within the first two years of the Framework Contract.
7	I am not an accredited Living Wage Employer and do not currently pay the Real Living Wage to all employees.

*(formerly named Vigilant Security (Scotland) Limited)

Scotland Excel

To: Executive Sub-Committee

On: 26 January 2024

**Report by:
Chief Executive of Scotland Excel**

Tender: Grounds and Plant Equipment

Schedule: 1522

Period: 48 months

1. Introduction and Background

This recommendation is for the award of a third-generation renewal framework for Grounds and Plant Equipment, bringing together two existing second-generation frameworks, Grounds Maintenance Equipment and Light and Heavy Plant.

The framework will provide councils and other participating bodies with a mechanism to procure a range of grounds maintenance equipment including but not limited to handheld equipment, ride-on equipment, towed equipment, tractors and pedestrian sweepers. It also includes a range of light and heavy plant equipment including but not limited to excavators, pedestrian operated plant, ride on rollers, static plant, dumpers, pavers and mobile pothole fillers.

The framework will be for a period of 48 months (4 years from the commencement date) as advertised in the published tender documents. Subject to approval and completion of a standstill period, the framework is intended to commence in February 2024.

This report summarises the outcome of the procurement process for this national framework agreement and presents recommendations for award.

2. Scope, Participation and Spend

This framework was developed in conjunction with procurement professionals and operational stakeholders (grounds, fleet, and transport managers) from local authorities to provide sufficient product lists, and suitable terms and conditions enabling local authorities to make direct awards and conduct mini competitions via this framework.

As part of the strategy development and through consultation with the User Intelligence Group (UIG), the inclusion of eleven lots was endorsed as shown in

Table 1. The scope of this lot structure has been adapted to include improved and innovative products which better reflect the purchasing requirements of local authorities.

Table 1: Framework Structure

Lot Number	Description	Estimated % Spend through Lot
1	Handheld Equipment	4%
2	Push and Self-Propelled Equipment	14%
3	Seasonal and Specialist Equipment	4%
4	Grounds Vehicles, Tractors and Equipment	28%
5	Plant Excavation Equipment	15%
6	Pedestrian Operated Plant Equipment	2%
7	Plant Vehicles and Equipment	5%
8	Static Plant	3%
9	Plant Lifting Equipment	10%
10	Plant Road Surfacing Equipment	13%
11	Pressure Washers	2%

As detailed in Appendix 1, 31 councils, Tayside Contracts and a number of associate members have confirmed their intention to participate in this framework, with all councils being named on the advertised contact notice.

The framework was advertised at £8 million per annum, which is an estimated spend of £32 million over the 4-year lifetime of the framework. This advertised spend allows for increased participation from councils and associate members not currently utilising the framework.

3. Procurement Process

A Prior Information Notice (PIN) was published for this framework opportunity on 6 December 2022, which resulted in expressions of interest from 84 suppliers.

Thereafter, the Contract Notice was published via the Find a Tender and Public Contract Scotland (PCS) portal on the 5 September 2023, with the tender documentation being immediately available via the Public Contracts Scotland Tender (PCS-T) system. The tender exercise was conducted and concluded in accordance with the law and procedures currently in force.

The procurement exercise followed an open tender procedure to encourage maximum competition and participation.

The published tender documents anticipated the appointment to the framework of a range of tenderers with relevant and demonstrable experience and capabilities. There was no fixed number of tenderers to be awarded participation and no fixed score ensured success. The most economically advantageous tenderer or tenderers was/were to be identified following completion of the evaluation in accordance with the requirements set down within the tender

documents. The intention was to appoint a sufficient number of suppliers on each lot of the framework to meet the varied requirements of Councils.

The tender followed a two-stage tendering procedure undertaken concurrently. Stage one, Qualification, was conducted using the Single Procurement Document (SPD). Within the SPD, tenderers were required to answer a set of exclusionary questions along with providing details and/or acknowledgement of insurance, financial standing, quality management, health and safety, and environmental management policies and/or procedures.

At the second stage of the process, offers were evaluated against the award criteria applying the weightings outlined in Table 2.

Table 2: Evaluation Criteria / Weightings

Award Criteria	Total Available Scores
Commercial Section	70
Technical Section	30

Within the technical section, tenderers were required to evidence their knowledge and experience by responding to technical questions and method statements, as detailed in Table 3.

Tenderers were also asked to confirm their ability to service and could opt to service one, some or all council areas.

Table 3: Method Statement Scoring

Question	Award Criteria Points (All Lots)	Sub Criteria	Scoring Methodology
Method Statement 1 – Support Services and Spare Parts Management	8		
Pre and Post-Sales Support		3	5 Point Methodology
Operator/Mechanic Training		2	5 Point Methodology
Breakdown/Emergency Support Services Product Recall/Safety		3	5 Point Methodology
Product Recall/Safety		0	Not Scored
Management and Availability of Spare Parts		0	Not Scored
Method Statement 2 – Sustainability and Environment	10		
Processing of Refurbished/2 nd Hand stock and Warranties		2	5 Point Methodology
Repurchase/disposing council old product		2	5 Point Methodology
Fleet/Vehicle Environmental Standards		3	Not Scored
Carbon Footprint and Waste Reduction		3	Not Scored
Materials Waste Prevention		0	Not Scored
Plan for net Zero		0	Not Scored
Method Statement 3 - Operational Processes	6		
Delivery Timescales		3	5 Point Methodology
Warranty Process		3	5 Point Methodology
Service facilities		0	Not Scored
Operational Processes		0	Not Scored
Community Benefits	3		Yes/No
Workforce Matters	3		
Fair Work First		3	5 Point Methodology
Living Wage		0	Not Scored

Within the commercial section, tenderers were invited to offer on a lot by lot, item by item basis and provide prices against the various quantity bands of quantity 1, quantity 2-4 or quantity 5+. In addition, a minimum percentage discount for each of the stated quantity bands, for a selection of the most commonly purchased ground and plant equipment, was also requested.

Following a full evaluation of all submissions, scoring was completed in accordance with the published tender evaluation methodology, and a score was calculated for each tenderer.

4. Report on Offers Received

The tender documents were downloaded by 89 suppliers, with 39 tender responses received by the specified closing date and time. However, it should be noted that 2 tenderers withdrew from the evaluation process, leaving 37 tender responses to be evaluated.

Based on the criteria and scoring methodology set out in the tender documents, a full evaluation of offers received was completed. A summary of all the offers received and the scoring achieved by each tenderer is set out in Appendix 2

5. Recommendations

Based on the evaluation undertaken, and in line with the advertised criteria and weightings summarised above, it is recommended that a multi-supplier framework arrangement is awarded to 33 suppliers as outlined in Appendix 2.

These 33 recommended suppliers offer best value and represent a mix of micro, small, medium and large organisations.

The range of suppliers recommended provides coverage and competitive options for all participating bodies as well as offering a degree of choice and capacity.

The Executive Sub Committee is accordingly requested to approve the recommendation to award this framework as detailed in Appendix 2.

6. Benefits

Savings

This framework is recommended for approval with a neutral savings position.

A key outcome for this framework was to increase availability of cleaner, greener plant and equipment. Another positive outcome is that members have access to the various models of this type of equipment that meet their needs, with greater control over costs.

To help achieve this, and in addition to the commercial model being significantly updated to allow evaluation of base model equipment, as well as suitable additional attachments as options, the commercial model also allowed for

tenderers to offer alternative fuelled options within their Full Range Offer. These can be included throughout the lifetime of the framework.

This updated approach to pricing enables councils to add the additional attachments that they require, thus giving them greater flexibility and control over costs. In addition, it allowed tenderers to offer more environmentally friendly equipment alongside some of the more traditionally fuelled equipment and provided councils with greater visibility of their full offering, allowing them to make more environmentally informed decisions.

Indexation enables Scotland Excel to demonstrate to councils continued delivery of best value and to monitor framework prices against market performance. The changes made to the structure of this framework, combining products groups and changing commercial models, mean that it has not been possible to provide a comparison between the new framework and the previous frameworks.

As part of combining two existing frameworks into one offering, Scotland Excel included a question on cost drivers within the technical envelope. This will allow a review to be undertaken of the indexation model to ensure that the market indices being monitored are correct and relevant, as well as ensuring that the index weighting is appropriate based on council spend patterns.

Scotland Excel will work with successful suppliers at mobilisation stage to determine what indices would be the best to monitor in relation to their products.

This framework also provides a benefit from the efficiencies achieved through working collaboratively. With 31 local authorities indicating their intention to use this framework, the efficiencies based on employment time in the purchasing organisation is set out by the Scottish Government at £12,000 for this type of tender. This does not take account of the efficiencies achieved by Tayside Contracts or associate members.

It should also be noted by combining two previous frameworks, it enhances the efficiencies delivered.

Table 4 below summarises the benefits of this exercise to our members, in accordance with the [Scottish Government procurement benefits reporting guidance](#).

Table 4: Savings Summary

Reference	Type	Reportable Outcome
BT1	Direct price-based savings	£0
BT2	Price versus market savings	0% *
BT3	Process savings from use of collaborative arrangements	£372,000

* BT2 value unknown until Indexation model can be established.

Price Stability

All recommended suppliers have agreed to the 12-month fixed price period at the start of the framework. Provision thereafter is for price reviews once per 12-month period to accommodate market fluctuations. All requests for price increases will be evaluated against prevailing market conditions and supporting documentary evidence.

Suppliers may submit a price decrease at any time throughout the duration of the framework.

Rebate

The inclusion of a retrospective rebate of 0.75% will be applied to all framework spend above £100,000 and will be tracked and managed with suppliers through reporting of management information returns.

Sustainable Procurement Benefits

Sustainability

The following sustainability benefits represent the Scottish Government reporting guidance for sustainability-based benefits (BT14).

Within the technical section of the tender, Scotland Excel included a sustainability related method statement, which included questions related to the:

- ability to refurbish or offer 2nd hand stock and subsequent warranties, to promote reduce, re-use and recycling initiatives.
- ability to repurchase or dispose of old products.
- fleet / vehicle environmental standards used to carry out their day-to-day business activities and deliveries.
- activities undertaken to minimise the carbon footprint and increase waste reduction for call offs under the framework.
- materials waste prevention.
- an organisation's policy to achieve Net Zero.

Responses received as part of the tender exercise are summarised, below:

- low emissions or electric fleet
- promote reduce, recycle and re-use initiatives
- measuring and recording environmental improvements
- introduction of more technologically advanced equipment to reduce vibration ratings, lower emissions/power consumption and deliver higher performance outputs.

Community Benefits

Scotland Excel is committed to maximising community benefits delivery for members. Suppliers were asked to commit to the delivery of community benefit

initiatives against pre-agreed spend thresholds outlined within the community benefits method statement. These aim to be reflective of the National Indicators outlined within the Scottish Government's National Performance framework, and their underlying vision and goals. Councils will accrue 'community benefit points' based on their level of spending with a supplier. These 'points' correlate to a negotiable benefit that the council can elect to receive at any given point throughout the lifetime of the framework. Of the recommended suppliers, all 32 have committed to delivering these benefits. Scotland Excel will continue to engage with all appointed suppliers to drive maximum delivery of community benefits where appropriate.

Within the published tender documents, suppliers were given a list of indicative community benefits that could be agreed with councils. Examples of these are:

- Fundraising (Events in the local authority area for charity)
- Community Volunteering (Staff volunteering to local good causes)
- Work Experience (Placements for school students in the local authority)
- Training (Training sessions for wider community)
- Employability Workshops (Events in school, college, or community group)
- Supply Chain Development
- Donation of materials and/or labour
- Sponsorship (Local sports team or community event)
- Recruitment (within local authority area)

Scotland Excel will monitor delivery of these commitments during the lifetime of the framework, and this will also be reported through ongoing contract management returns.

Fair Work First Including the Real Living Wage

Scotland Excel and its members are committed to the delivery of high-quality public services and recognise that this is dependent on a workforce that is well-rewarded, well-motivated, well-led, has access to appropriate opportunities for training and skills development, are diverse and is engaged in decision making.

Within the technical section of the tender, suppliers were assessed on their approach to Fair Work First and payment of the Real Living Wage to their workforce. Of the 33 recommended suppliers, 29 pay the Real Living Wage with 3 being accredited Real Living Wage employers, as detailed in Appendix 2 – Scoring and Recommendations.

The 4 recommended suppliers who do not currently pay the Real Living Wage are Agrovista UK Limited, Henderson Grass Machinery Limited, Morris Leslie Plant Hire Limited and J. C. Peacock & Co. Limited.

Scotland Excel will continue to monitor Fair Work First, including encouraging further uptake to both suppliers that are yet to commit to paying staff the Real Living Wage, during contract and supplier management activity.

7. Contract Mobilisation and Management

As part of the mobilisation process all successful suppliers will be invited to a contract mobilisation session to outline the operation of the framework, including roles and responsibilities, management information and community benefit commitments. Suppliers and participating members will be issued with a mobilisation pack containing all required details to utilise the framework.

In accordance with Scotland Excel's established contract segmentation tool, this framework is classified as class E. As such, it will require annual supplier contact, annual surveys and annual user group reviews as appropriate. Scotland Excel will continue to engage with suppliers on a regular basis to manage the response to the pandemic and ensure continuity of this essential service delivery for members.

8. Summary

This new framework for the supply and delivery of Grounds and Plant Equipment aims to maximise collaboration, support councils' fleet, parks and grounds departments to deliver the various services they provide and deliver best value. A range of benefits can be reported in relation to best value, sustainability and community benefits.

The Executive Sub Committee is requested to approve the recommendation to award this framework agreement as detailed in Appendix 2.

Note: a key for Real Living Wage Status Reference and Descriptions is included below.

Key: Real Living Wage Status Reference and Descriptions

Real Living Wage Status Reference	Real Living Wage Status Description
1	I am an accredited Living Wage Employer and commit to maintaining this for the duration of the Framework Contract.
2	I am currently going through the process of becoming an accredited Living Wage Employer and commit to gaining accreditation over the initial two year period of the Framework Contract. I currently pay the Living Wage to all employees (except volunteers, apprentices and interns).
3	I am not an accredited Living Wage Employer but commit to gaining accreditation over the initial two year period of the Framework Contract. I currently pay the Living Wage to all employees (except volunteers, apprentices and interns) and commit to maintaining this until I have gained accreditation.
4	I am not an accredited Living Wage Employer but commit to gaining accreditation over the initial two year period of the Framework Contract. I do not currently pay the Living Wage to all employees.
5	I am not an accredited Living Wage Employer but pay the Living Wage to all employees (except volunteers, apprentices and interns) and commit to maintaining this for the duration of the Framework Contract.
6	I am not an accredited Living Wage Employer and do not currently pay the Living Wage to all employees but commit to paying the Living Wage to all employees (except volunteers, apprentices and interns) within the first two years of the Framework Contract.
7	I am not an accredited Living Wage Employer and do not currently pay the Living Wage to all employees.

Scotland Excel

To: Executive Sub-Committee

On: 26 January 2024

**Report by:
Chief Executive of Scotland Excel**

**Wellbeing and Sustainable
Development (Scotland)
Bill**

Consultation Response

1. Introduction

The Scottish Government published a consultation to help inform the scope of any legislation for a proposed Wellbeing and Sustainable Development Bill in December 2023.

This consultation covers a broad spectrum of considerations for public bodies; how decisions taken will influence the wellbeing and sustainable development of those living in Scotland now, and in the future.

The draft response has a particular emphasis on procurement. With £14.5 billion public procurement spend in 2020-2021¹, any duties embedded by the proposed Bill have relevance for improving outcomes for citizens, underpinning the National Performance Framework.

2. Consultation Response

A draft response to the consultation has been prepared and is presented to the committee in Appendix 1.

3. Recommendation

Committee members are requested to review and comment on the content of the draft submission. Comments will be considered for inclusion in the submission to the Scottish Government before the deadline for this consultation.

Wellbeing and Sustainable Development (Scotland) Bill

Consultation Response

Prepared January 2024

1. Is a statutory definition of 'wellbeing' required?

Yes.

2. Do you have any views on how 'wellbeing' can be clearly defined in legislation?

This response is in the context of collaborative procurement acting as a mechanism for delivering public sector outcomes. Scotland Excel is the centre of procurement expertise for the local government sector serving Scotland's 32 local authorities and over 150 associate members from the public and third sector.

The organisation was established in 2008 in response to the McClelland Review of Public Procurement in Scotland, which recommended increased collaboration and improved procurement capability across the public sector. Over the past 15 years, Scotland Excel has worked closely with the Scottish Government and other centres of expertise on initiatives to raise the profile of public procurement and maximise the social, economic and environmental benefits it can bring.

Any legislative definition of "wellbeing" should align with the existing obligations under the sustainable procurement duty. A clear legislative definition would aid in establishing clarity for businesses, charities, and other providers of goods, works and services to the public sector on the obligations conferred on them by public contracts.

The Procurement Reform (Scotland) Act 2014 is underpinned by the National Performance Framework (NPF). It sets out the sustainable procurement duty which requires that a contracting authority must consider how it can improve the social, environmental, and economic wellbeing with a focus on reducing inequality.

The current definition in the context of the NPF, where wellbeing is defined as *"living well" as individuals and, collectively, as a society* could be extended in line with the World Health Organisation's definition. This more closely aligns with the sustainable procurement duty which states:

"Well-being is a positive state experienced by individuals and societies. Similar to health, it is a resource for daily life and is determined by social, economic, and environmental conditions."

3. Is a statutory definition of 'sustainable development' required?

Yes

4. Do you agree with our proposal that any definition of sustainable development should be aligned with the common definition: "development that meets the needs of the present without compromising the ability of future generations to meet their own needs"?

Yes. Definition should be more aspirational "development that meets the needs of the present **and enables** future generations to meet their own needs".

5. Do you have other views on how 'sustainable development' can be clearly defined in legislation?

As above, consideration should be given as to how the new definition will align with duties already placed on public authorities under the Procurement Reform Act (Scotland) 2014.

6. What future wellbeing issues or challenges do you think legislation could help ensure we address?

Providing a common definition of wellbeing and legislating for alignment of public services with the definition creates clarity of purpose for public contracting. By setting out how any procured solution must consistently enhance wellbeing, there is potential to support the delivery of the national procurement strategy.

The recently published Public Procurement Strategy for Scotland 2023-2028 aligns with the National Performance Framework and places public procurement *"...at the heart of a sustainable economy to maximise value for the people of Scotland"*. The strategy is structured around the four primary areas:

- Good for businesses and employees
- Good for society
- Good for places and communities
- Open and connected.

Clear and consistent language in respect of wellbeing and community development could be used in support of the following strategic factors as set out below:

- Good for businesses and employees
 - **Suppliers** - bringing clarity to the role suppliers play in meeting the needs of citizens
 - **Supply Chain and Resilience** - articulating the importance of ethical supply chains in the national context
 - **SMEs, Third Sector and Supported Businesses** - evidencing the additional value the third and voluntary sector brings to societal outcomes when public contracts are formed in that sector
 - **Contract Management** - ensuring ongoing delivery of procured solutions continue to deliver for citizens.
 -
- Good for society
 - **Economic Wellbeing** - decision making in public procurement supports wellbeing and community development
 - **Emergency Situations** – managing societal risks to the benefit of all citizens through decision making that prioritises wellbeing
 - **Food Security** - articulating the role that responsible food production has within health and wellbeing, and procuring accordingly

- Good for places and communities
 - **Community Wealth Building – Fair Work First and Community Benefits** - Strengthening the links between these established mechanisms and their role in enhancing wellbeing
 - **Supporting a sustainable built environment** - recognising the importance of the built environment in the quality of peoples’ lives and establishing measures which move the construction procurement from a focus on cost management to outcomes
 - **Whole life costing** - including wellbeing considerations in measuring the benefits of public investment had potential to contribute to the success of several of these listed factors
 - **Community Participation** - involving citizens in public spending decisions to ensure measurable improvements in their experience of public services
 - **Climate Crisis and Environment** - linking specifications in contracts to climate change mitigation for society will be helpful. By defining tangible outcomes for suppliers more measurable change will follow.
- Open and connected.
 - The factors here are **Global Reach, Connectivity and Consistency**– all of these are improved by bringing greater clarity and common language to the expected outcomes from public procurement.

7. We are aware that the term ‘sustainable development’ has been set out in various legislation of the Scottish Parliament since devolution in 1999, and that careful consideration will need to be given to how any new definition will impact on these. What impact, if any, would the proposed definition have on other areas of legislation?

As above, consideration should be given as to how the new definition will align with duties already placed on public authorities under the Procurement Reform Act (Scotland) 2014.

8. How should a legal duty be defined to ensure that public authorities uphold sustainable development and the interests of future generations?

Public procurement in Scotland has a proven record of delivering sustainable outcomes. This is embedded legislatively through the sustainable procurement duty as part of the Procurement Reform (Scotland) Act 2014. The opportunity from a more defined approach to wellbeing is to bring greater clarity, consistency and accountability in delivery of public services.

9. Are there specific areas of decision making that should be included or excluded from the Bill?

The focus of this response to the consultation is on the role public procurement can play. The proposals on definitions and legislative clarity are welcomed. The extent to which Local Government decision making should be included within the Bill is beyond the scope of our response.

Once the decision to procure is made by councils, Scotland Excel facilitates collaboration to deliver national arrangements to optimise sustainable outcomes.

There are existing mechanisms through the sustainable procurement duty which legislates for a balance between environmental, social and commercial considerations in public contracts. The weightings apportioned to each is determined by the market and the outcomes required from the procurement exercise. Determination of appropriate weightings are made using tools and guidance published alongside the sustainable procurement duty, including life cycle impact mapping, sustainability test and prioritisation tool.

The opportunity afforded by the Wellbeing and Sustainable Development Bill is to bring enhanced clarity, consistency and language to contractual relationships. The potential exists to clearly link those outcomes delivered through procured solutions to those delivered by public bodies directly.

10. What issues, if any, may result from strengthening the requirement to have regard to the National Outcomes?

Scotland Excel welcome this development as in alignment with the existing legislative and policy landscape of procurement.

11. Should any duty apply to the Scottish Government?

Yes.

12. Do you have any views on the range and type of organisations that any duty should apply to?

All public bodies in Scotland.

13. Do you have any views on how we can better report the achievement of wellbeing objectives which supports clear accountability and scrutiny of public bodies in Scotland?

The Procurement Reform (Scotland) Act 2014 requires contracting authorities to prepare an annual procurement report summarising regulated procurement activity in each financial year. The annual procurement report template contains a range of measures including summary of current/future regulated procurements, compliance with procurement strategy, community benefits, fair work first, Real Living Wage, payment performance and spend and savings summary.

In addition, Procurement Benefits Reporting Guidance was published in 2019 with detailed directions on the reporting of savings and benefits. Methodologies for recording Benefit Types and Best Practice Indicators are set out in recognition of the need to articulate value more broadly.

It is essential that the benefits of procurement are quantified through robust contract management and reporting mechanisms. While economic and social measures are well embedded in policy and procedure, environmental measures are under-represented. There is a need to increase consistency in what is being measured, how this is defined and to develop an appropriate national repository for data. This will strengthen the sector's ability to evidence delivery aligned to the provisions of the National Performance Framework.

14. What additional steps are needed to ensure collaboration and working across boundaries?

A robust level of commitment to collaborative approaches is essential to ensure efficiency, outcomes and value for money are maximised. This can be achieved while recognising diverse local economic requirements.

15. Do you have any views on whether any duty related to ways of working could create conflicts with duties currently placed on you?

This response is informed on the basis of the proposals being an enhancement to the current legislative framework while bringing clarity to the reporting landscape.

16. Do you have any views on the additional resource implications necessary to discharge any wellbeing duty in your organisation?

New legislative duties will likely come with additional reporting requirements which in turn require resources to be allocated appropriately.

17. Should Scotland establish an independent Commissioner for Future Generations? (Yes/No/Don't Know)

Don't know.

18. In what ways could an independent Commissioner for Future Generations increase the accountability, scrutiny and support for decision making?

This is not yet clear in the context of public procurement and has not therefore formed part of this response.

19. Are there alternative ways we can increase the accountability, scrutiny and support for decision making?

Commentary on this topic is beyond the context of public procurement and does not form part of this response.

Scotland Excel

To: Executive Sub-Committee

On: 26 January 2024

**Report by:
Chief Executive of Scotland Excel**

**Request for Associate Membership of Scotland Excel by:
Paragon Housing Association Ltd**

1. Background

- 1.1 Scotland Excel operates an Associate programme to allow access to its frameworks and services to a wide range of other public service orientated bodies. Applications can be made for Associate Membership by organisations such as council arm's length organisations, community groups, charities, housing associations and voluntary organisations which are a public body or a body that engages in activities of a public nature.

Organisations apply to Scotland Excel for Associate Membership to allow them to access the frameworks for goods and services which are in place for members. Associates do not have the opportunity to influence the future contract delivery schedule which is reserved for the full local authority members.

Associate membership supports the wider aims of Scotland Excel by increasing overall spend against frameworks, providing additional income and supporting the goals of promoting excellent public procurement across Scottish organisations.

2. Organisation Background

- 2.1 Paragon Housing Association Ltd is based in the Forth Valley area of Scotland and has over 1400 properties across Clackmannanshire, Falkirk, and Stirling.

Paragon Housing Association Ltd is a Registered Society (under the Co-operative and Community Benefit Societies Act 2014), a Registered Social Landlord (under the Housing Scotland Act 2010) and is registered as a Scottish charity.

- 2.2 Paragon Housing Association Ltd is a real living wage employer.

3. Associate Membership Process

- 3.1 Before any application is submitted for approval, a number of validation checks on the organisation are carried out. These include a review of the Memorandum & Articles of Association, the financial position and the type of contracts that the organisation is likely to access. It is confirmed that satisfactory validation checks have been completed in relation to this application.
- 3.2 Scotland Excel monitors all requests from applicants to become associate members to ensure that any legal requirements are met. In this case, Paragon Housing Association Ltd can be recommended for associate membership on the basis of the Local Authorities (Goods and Services) Act 1970 section 1 (1B)(c). Namely, that it has functions that are public in nature or engages in activities of that nature so long as the purpose or effect of access to Scotland Excel's services is to facilitate its discharge of those functions or activities.
- 3.3 Fees are determined in a number of ways:
- Arms Length External Organisations (ALEOs) related to local authority members pay no fee as this is covered within requisition fees.
- National Health Service (NHS) bodies, Colleges and Universities, and Non departmental bodies of the Scottish Government pay no fee under a reciprocal agreement that allows local authorities to utilise contracts created by the relevant procurement centres of expertise.
- All other associate fees are calculated on a standard methodology agreed by committee. e.g. Housing Associations pay based on the number of houses within their portfolio.

4. Recommendations

- 4.1 It is recommended to committee that the Paragon Housing Association Ltd application to join Scotland Excel as an associate member be approved, with an annual fee of £2,240 subject to the agreement document.
