

## **Notice of Meeting and Agenda Scotland Excel Executive Sub-committee**

<b>Date</b>	<b>Time</b>	<b>Venue</b>
Friday, 19 April 2024	09:30	Remotely by MS teams,

MARK CONAGHAN  
Clerk

### **Membership**

Councillor John Shaw (Renfrewshire Council) (Convener) and Councillor Altany Craik (Fife Council) (Vice Convener).

Councillor David Keating (Aberdeenshire Council): Councillor Brenda Durno (Angus Council): Councillor Mandy Watt (City of Edinburgh Council): Councillor Kenny Macleod (Comhairle Nan Eilean Siar): Councillor Carlyne Wilson (Dumfries & Galloway Council): Councillor Ruairi Kelly (Glasgow City Council): Councillor Derek Loudon (Highland Council): Councillor Christina Larsen (North Ayrshire Council): Councillor Michael McPake (North Lanarkshire Council): Councillor Dennis Leask (Shetland Islands Council): Councillor Chris Cullen (South Ayrshire Council): Councillor Walter Brogan (South Lanarkshire Council).

### **To Follow Item**

I refer to the agenda for the meeting of the Scotland Excel Executive Sub-committee to be held on 19 April 2024 at 9.30 am and enclose the undernoted report relative to item 3(c) previously marked 'to follow':

## Items of business

### 3(c) **Contract for Approval: Supply and Delivery of Construction Materials**

3 - 18

Report by Chief Executive of Scotland Excel.

## Scotland Excel

**To:** Executive Sub-Committee

**On:** 19 April 2024

**Report by:**  
Chief Executive of Scotland Excel

**Tender:** Supply and Delivery of Construction Materials

**Schedule:** 1422

**Period:** Three years from commencement date with an option to extend for up to a further 12 months

### 1. Introduction and Background

This recommendation is for the award of a consolidated renewal framework for Construction Materials, bringing together six separate construction and roads related materials frameworks.

This framework will provide councils and other participating bodies with a mechanism to procure a range of materials including electrical, building and timber, plumbing and heating, road maintenance and trade materials that support construction projects, ongoing maintenance schedules and ad-hoc repairs. Numerous council departments are likely to use the framework including, stores, housing, property maintenance, roads, parts and repair, schools, depots and other facilities.

The framework will be for a maximum period of 3 years from the commencement date with an option to extend the framework period for up to a further 12 months subject to satisfactory operation and performance as advertised in the published tender documents. Subject to approval and completion of a standstill period, the framework is intended to commence in May 2024.

This report summarises the outcome of the procurement process for this national framework agreement and presents recommendations for award.

### 2. Scope, Participation and Spend

The consolidation of six, previously separate frameworks into a single tender involved considerable input and expertise. Given this, the framework was developed in conjunction with procurement professionals and construction-related stakeholders from local authorities to provide sufficient product lists, and

suitable terms and conditions enabling local authorities to make direct awards and conduct mini competitions to secure further value via this framework.

As part of the strategy development and through consultation with the User Intelligence Group (UIG) and other key stakeholders the inclusion of five lots (and thirteen sub-lots) was endorsed as shown in Table 1. The scope of this lot structure has been adapted to include product lists which better reflect the purchasing requirements of local authorities.

**Table 1: Framework Structure**

<b>Lot No.</b>	<b>Lot Description</b>	<b>Sub-Lot No.</b>	<b>Sub-Lot Description</b>	<b>Estimated % Spend through Lot/Sub-Lot</b>
<b>1</b>	<b>Electrical Materials</b>			<b>33%</b>
		1.1	General Electrical Materials	27%
		1.2	Cables and Wiring	6%
<b>2</b>	<b>Building and Timber Materials</b>			<b>28%</b>
		2.1	General Timber Materials	16.5%
		2.2	Laminated Walls Panels	3.5%
		2.3	Kitchen Units and Worktops	1.2%
		2.4	Building and Roofing Materials	6.7%
		2.5	Natural and Dimensional Stone for Build and Repair	0.1%
<b>3</b>	<b>Plumbing and Heating Materials</b>			<b>27%</b>
		3.1	General Plumbing and Heating Materials	15%
		3.2	Sanitary Ware, Accessories and Adaptations	12%
<b>4</b>	<b>Trade Materials and Power Tools</b>			<b>10%</b>
		4.1	Tools	2%
		4.2	Ironmongery, Fixings, Adhesives, Sealants and Silicones	6%
		4.3	Paint and Paint Sundries	2%
<b>5</b>	<b>Road Maintenance Materials</b>			<b>2%</b>
		5.1	General Road Maintenance Materials	2%

As detailed in Appendix 1, 32 councils, Tayside Contracts and a number of associate members have confirmed their intention to participate in this framework, with all councils being named on the advertised contact notice.

The framework was advertised at £70 million per annum, which is an estimated spend of £280 million over the maximum 4-year lifetime of the framework. This advertised spend allows for increased participation from councils and associate members not currently utilising the framework.

### 3. Procurement Process

A Prior Information Notice (PIN) was published for this framework opportunity on 29 August 2023, which resulted in expressions of interest from 130 suppliers.

Thereafter, the Contract Notice was published via the Find a Tender and Public Contracts Scotland (PCS) portal on the 8 January 2024, with the tender documentation being immediately available via the Public Contracts Scotland Tender (PCS-T) system. The tender exercise was conducted and concluded in accordance with the law and procedures currently in force.

The procurement exercise followed an open tender procedure to encourage maximum competition and participation.

The published tender documents anticipated the appointment to the framework of a range of tenderers with relevant and demonstrable experience and capabilities. There was no fixed number of tenderers to be awarded participation and no fixed score ensured success. The most economically advantageous tenderer or tenderers was/were to be identified following completion of the evaluation in accordance with the requirements set down within the tender documents. The intention was to appoint a sufficient number of suppliers on each lot of the framework to meet the varied requirements of Councils.

The tender followed a two-stage tendering procedure undertaken concurrently. Stage one, Qualification, was conducted using the Single Procurement Document (SPD). Within the SPD, tenderers were required to answer a set of exclusionary questions along with providing details and/or acknowledgement of insurance, financial standing, quality management, health and safety, and environmental management policies and/or procedures. Tenderers offering for Lot 2 (Building and Timber Materials), sub-lots 2.1-2.3 also had to meet requirements relative to legal and sustainable timber.

At the second stage of the process, offers were evaluated against the award criteria applying the weightings outlined in Table 2.

**Table 2: Evaluation Criteria / Weightings**

Award Criteria	Total Available Scores
Commercial Section	80
Technical Section	20

Within the technical section, tenderers were required to evidence their knowledge and experience by responding to technical questions and method statements, as detailed in Table 3.

In addition, for Lot 2 Building and Timber Materials, Efeca provided a formal assessment of evidence of compliance with legal and sustainable criteria for timber and all wood derived products in sub-lot 2.1 General Timber Materials, sub-lot 2.2 Laminated Walls Panels and sub-lot 2.3 Kitchen Units and Worktops.

Historic Environment Scotland provided an assessment of technical data and certification submitted by Tenderers bidding for sub-lot 2.5 Natural and Dimensional Stone for Build and Repair.

Tenderers were also asked to respond to a number of non-scored questions that had important contractual effects. This included confirming their ability to service, where they could opt to service one, some or all council areas.

**Table 3: Method Statement Scoring**

Question	Award Criteria Points for All Lots	Award Criteria Points for Lot 2 (timber sub-lots 2.1 - 2.3)	Scoring Methodology
<b>Method Statement 1 - Service and Delivery</b>	<b>4.5</b>	<b>4.5</b>	
Operational Processes and Resources	1.5	1.5	Five Point Scoring Methodology
Stock Management and Continuity of Supply	1.5	1.5	Five Point Scoring Methodology
Delivery Capabilities	1.5	1.5	Five Point Scoring Methodology
<b>Method Statement 2 - Contract Management</b>	<b>3.5</b>	<b>3.5</b>	
Customer Service and Complaint Management	1.5	1.5	Five Point Scoring Methodology
Management of Non-Core	2	2	Five Point Scoring Methodology
<b>Method Statement 3 - Sustainability</b>	<b>4</b>	<b>4</b>	Five Point Scoring Methodology
Carbon and Waste Reduction	2	2	Five Point Scoring Methodology
Transportation	1	1	Five Point Scoring Methodology
Supply Chain	1	1	Five Point Scoring Methodology
Policy to Reach Net Zero			Non-Scored Question
<b>Method Statement 5 - Timber Sustainability</b>	<b>-</b>	<b>2</b>	Five Point Scoring Methodology
<b>Community Benefits</b>	<b>4</b>	<b>3</b>	Yes/No
<b>Workforce Matters</b>	<b>4</b>	<b>3</b>	Five Point Scoring Methodology
Method Statement 4 - Fair Work First	4	3	Five Point Scoring Methodology
Real Living Wage			Non-Scored Question

Within the commercial section, tenderers were invited to offer on a lot by lot (and sub-lot), item by item basis and provide a national delivered price for all items on the framework.

Tenders were subject to a minimum bid requirement. All tenders proceeded in the evaluation in accordance with permitted discretions. Tenderers also had the option to offer other, representative products within their submission.

Following a full evaluation of all submissions, scoring was completed in accordance with the published tender evaluation methodology, and a score was calculated for each tenderer.

#### 4. Report on Offers Received

The tender documents were downloaded by 137 suppliers, with 70 tender responses received by the specified closing date and time.

One tenderer subsequently withdrew its offer. Two tenderers who were deemed non-compliant in part and were advised that their offers for the relevant sub-lots would not be considered. In one instance this was due to a failure to meet the

minimum selection requirements and, in the other, due to a failure to submit a commercial offer.

Based on the criteria and scoring methodology set out in the tender documents, a full evaluation of offers received was completed. A summary of all the offers received and the scoring achieved by each tenderer is set out in Appendix 2

## **5. Recommendations**

Based on the evaluation undertaken, and in line with the advertised criteria and weightings summarised above, it is recommended that a multi-supplier framework arrangement is awarded to 54 suppliers as outlined in Appendix 2. In a small number of cases award will be subject to final clarification.

These 54 recommended suppliers offer best value and represent a mix of micro, small, medium and large organisations.

The range of suppliers recommended provides coverage and competitive options for all participating bodies as well as offering a degree of choice and capacity.

The Executive Sub Committee is accordingly requested to approve the recommendation to award this framework as detailed in Appendix 2.

## **6. Benefits**

### **Savings**

This framework is recommended for approval with a benchmarked average savings position of 4.31%.

A key outcome for this framework was to streamline and better align the contract management processes of similar materials contracts to avoid unnecessary duplication and increase efficiencies for both customers and suppliers alike.

In addition, the commercial model also allowed for tenderers to offer within their submissions additional or alternative products under a Full Range Offer. This will help facilitate the offering of product alternatives. These can be included throughout the lifetime of the framework.

This updated approach enables councils to have greater control over costs. In addition, it allowed tenderers to offer alternative products and should provide councils with greater visibility of their full offering, allowing them to make more commercially informed decisions.

Indexation enables Scotland Excel to demonstrate to councils continued delivery of best value and to monitor framework prices against market performance. The changes made to the structure of this framework, combining various frameworks into one and changing commercial models, mean that it has not been possible to provide a comparison between the new framework and the previous frameworks.

Scotland Excel included a question on cost drivers within the technical envelope. This will allow a review to be undertaken of the indexation model to ensure that the market indices being monitored are correct and relevant, as well as ensuring that the index weighting is appropriate based on council spend patterns.

Scotland Excel will work with successful suppliers at mobilisation stage to determine what indices would be the best to monitor in relation to their products.

This framework also provides a benefit from the efficiencies achieved through working collaboratively. With 32 local authorities indicating their intention to use this framework, the efficiencies based on employment time in the purchasing organisation is set out by the Scottish Government at £12,500 for this type of tender. This does not take account of the additional efficiencies achieved by Tayside Contracts or associate members.

It should also be noted by combining six previous frameworks, the available efficiencies from operating call offs from the framework are increased. For that reason the non-cashable process savings identified as BT3 in table 4 have been multiplied by six.

Table 4 below summarises the benefits of this exercise to our members, in accordance with the [Scottish Government procurement benefits reporting guidance](#).

**Table 4: Savings Summary**

Reference	Type	Reportable Outcome
BT1	Direct price-based savings	£2,573,891
BT2	Price versus market savings	0% *
BT3	Process savings from use of collaborative arrangements	£2,400,000

\* BT2 value unknown until Indexation model can be established.

### Price Stability

All recommended suppliers have agreed to the fixed price period at the start of the framework. This period varies depending upon lot/sub-lot and ranges from 3-months to 12-months. The flexibility to respond to exceptional situations was retained within the contract. Provision thereafter is for price reviews once per period to accommodate market fluctuations. All requests for price increases will be evaluated against prevailing market conditions and supporting documentary evidence.

Suppliers may submit a price decrease at any time throughout the duration of the framework.

## **Rebate**

The inclusion of a retrospective rebate of 1.2% will be applied to all Council spend above £100,000 and will be tracked and managed with suppliers through reporting of management information returns. This rebate is set at 1.1% payable to Councils and 0.1% payable to Scotland Excel.

## **Sustainable Procurement Benefits**

### **Sustainability**

The following sustainability benefits represent the Scottish Government reporting guidance for sustainability-based benefits (BT14).

Within the technical section of the tender, Scotland Excel included a sustainability related method statement, which included questions related to the:

- fleet / vehicle environmental standards used to carry out their day-to-day business activities and deliveries
- activities undertaken to minimise the carbon footprint and increase waste reduction for call offs under the framework
- materials waste prevention
- products that come from sustainable, reliable and approved sources
- an organisation's policy to achieve Net Zero

Responses received as part of the tender exercise are summarised, below:

- Euro 6 certified vehicles
- Driver training for fuel-efficient vehicle operation
- Recyclable packaging and products
- Installation of efficient LED lighting technology in branches
- Transitioning fleet to electric vehicles
- Upgrading branches from gas to Solar PV Technology heating

### **Community Benefits**

Scotland Excel is committed to maximising community benefits delivery for members. Suppliers were asked to commit to the delivery of community benefit initiatives against pre-agreed spend thresholds outlined within the community benefits method statement. These aim to be reflective of the National Indicators outlined within the Scottish Government's National Performance framework, and their underlying vision and goals. Councils will accrue 'community benefit points' based on their level of spending with a supplier. These 'points' correlate to a negotiable benefit that the council can elect to receive at any given point throughout the lifetime of the framework. Of the recommended suppliers, all have committed to delivering these benefits. Scotland Excel will continue to engage with all appointed suppliers to drive maximum delivery of community benefits where appropriate.

Within the published tender documents, suppliers were given a list of indicative community benefits that could be agreed with councils. Examples of these are:

- Fundraising (Events in the local authority area for charity)
- Work Experience (Placements for school students in the local authority)
- Training (Training sessions for wider community)
- Employability Workshops (Events in school, college, or community group)
- Donation of materials and/or labour
- Sponsorship (Local sports team or community event)
- Recruitment (within local authority area)

Scotland Excel will monitor delivery of these commitments during the lifetime of the framework, and this will also be reported through ongoing contract management returns.

### **Fair Work First Including the Real Living Wage**

Scotland Excel and its members are committed to the delivery of high-quality public services and recognise that this is dependent on a workforce that is well-rewarded, well-motivated, well-led, has access to appropriate opportunities for training and skills development, are diverse and is engaged in decision making.

Within the technical section of the tender, suppliers were assessed on their approach to Fair Work First and payment of the Real Living Wage to their workforce. Of the 54 recommended suppliers, 37 pay the Real Living Wage with 5 being accredited Real Living Wage employers, as detailed in Appendix 2 – Scoring and Recommendations.

The 17 recommended suppliers who do not currently pay the Real Living Wage are detailed in Appendix 2, with options 4, 6 or 7 selected.

Scotland Excel will continue to monitor Fair Work First, including encouraging further uptake to suppliers that are yet to commit to paying staff the Real Living Wage, with a particular focus on option 7 (not an accredited Living Wage Employer and do not currently pay the Living Wage to all employees), during contract and supplier management activity.

## **7. Contract Mobilisation and Management**

As part of the mobilisation process all successful suppliers will be invited to a contract mobilisation session to outline the operation of the framework, including roles and responsibilities, management information and community benefit commitments. Suppliers and participating members will be issued with a mobilisation pack containing all required details to utilise the framework.

In accordance with Scotland Excel's established contract segmentation tool, this framework is classified as class C. As such, it will require annual supplier contact, annual surveys and annual user group reviews as appropriate. Scotland Excel will continue to engage with suppliers on a regular basis to ensure continuity of this essential service delivery for members.

## **8. Summary**

This new framework for the Supply and Delivery of Construction Materials aims to maximise collaboration, support councils' construction and roads departments to deliver the various services they provide and deliver best value. A range of benefits can be reported in relation to efficiencies, best value, sustainability and community benefits.

The Executive Sub Committee is requested to approve the recommendation to award this framework agreement as detailed in Appendix 2.

**Appendix 1 – Participation, Spend and Savings Summary  
1422 Construction Materials**

Member Name	Participation in Contract	Participation Entry Date	Estimated Annual Spend (£)	Source of Spend Data	% Estimated Forecast Savings	Estimated Annual Savings (£)	Basis of Savings Calculation
