8. Supporting Attendance Activity

- 8.1 Recent and planned actions to improve absence performance include the following:-
- Proactively contacting managers who have absence cases of 2 to 4 weeks in duration, to monitor action taken to date and proposed next steps. This is to ensure that managers intervene early in absence cases and keep in regular contact with absent employees. In turn, discussion is facilitated around the

employee's progress, any support that may be required and allows flexible return to work options to be explored.

- The introduction of an electronic referral management system in February 2015 operated by the new Occupational Health Service provider, People Asset Management (PAM). This system simplifies the referral process, facilitates early intervention in cases and increases the speed with which medical guidance is received. It also enables Occupational Health Service appointment details to be sent directly to an employee's mobile telephone number, where made available.
- Continued delivery of supporting attendance training at a corporate level for managers, with the provision of tailored training for managers and employees at a service level on request.
- Seasonal flu vaccination programme.
- Ongoing health promotion activities including smoking cessation, mental health awareness, events aimed at raising employee awareness of health issues and providing opportunities to try different sport/exercise activities. A number of taster activities have been offered to employees including free swims, blood pressure and mini fitness checks.
- Ongoing work to improve the absence information available to managers, and to streamline supporting attendance related processes to facilitate prompt absence reporting, recording and updating of relevant systems.
