

### **Scotland Excel**

To: Executive Sub Committee

On: 9 December 2016

Report by Director Scotland Excel

**Tender:** Supply and Delivery of Vehicle Parts

Schedule: 01/16

Period: 1 January 2017 until 31 December 2020

### 1. Introduction and Background

The current framework for Supply and Delivery of Vehicle Parts will expire on 31 December 2016. This proposed renewal framework will operate from 1 January 2017 until 31 December 2020.

This renewal will be a third generation framework agreement for this commodity and the framework will provide councils and other participating bodies with a mechanism to procure a wide range of vehicle parts, windscreen replacement, workshop consumables, auto electrics and hydraulics covering the varied fleet mix across councils. This incorporates everything from cars and light vans up to 44 tonne refuse collection vehicles (RCV) and other specialist heavy vehicles.

### 2. Scope, Participation and Spend

As part of strategy development, the User Intelligence Group (UIG) endorsed the inclusion of seven lots as summarised in Table 1. This lotting strategy was designed to more closely align with council requirements whilst also recognising the current structure of the market place. The lotting strategy continued to maximise opportunities for SMEs.

**Table 1: Lotting Structure** 

Lot No.	Description	Estimated % of Spend
1	Parts for Light and Heavy Vehicles	80%
2	Auto Electric and Parts	6%
3	Hydraulics	4%
4	Replacement Sweepers and Brushers	1%
5	Replacement Glass	3%
6	Consumables	2%
7	Parts of Specialist Vehicles	4%

As detailed in Appendix 1, 29 councils plus Tayside Contracts have confirmed their intention to participate in this framework. North Ayrshire & South Ayrshire Councils who are not participating in this framework have their own arrangements in place using an embedded or managed service model, where the supplier manages vehicle spare parts on behalf of fleet maintenance departments within the council premises. The remaining council who will not be participating in this framework is Stirling council who outsource this work as they do not have the facilities to carry this out in house.

All 32 councils and Tayside Contracts were included in the Contract Notice for the framework.

The forecast annual spend for participating councils is £7.25m per annum, equating to an estimated £29m over the term of the framework. Whilst considering one of the key objectives of the framework, to attract suppliers of specialist vehicle parts and the high spend that is associated with this area, and to ensure flexibility & growth for all councils, a contingency was incorporated into this framework to have increased expenditure and the framework was advertised at £48m value for the full 4 year term.

#### 3. Procurement Process

A UIG consisting of representatives from participating councils endorsed the procurement strategy on 3 May 2016. In addition, a working group of technical and procurement representatives was formed to review technical specifications and participate in the evaluation.

A Prior Information Notice (PIN) was published on 11 April 2016, which resulted in expressions of interest from 60 organisations. As a result of this considerable and very positive interest, meetings were held with potential bidders including both incumbent and new suppliers. During these meetings, ability to service, trading processes, market trends, community benefits and sustainability were discussed as well as potential product lists and specifications.

Thereafter, in order to ensure maximum competition, the UIG agreed that an open tender process should be followed to establish the renewal framework. The Contract Notice was published via the Office Journal of the European Union and the Public Contracts Scotland portal (PCS) on 16<sup>th</sup> September 2016 with the tender documentation being made available for immediate download from 19<sup>th</sup> September 2016, via the Public Contracts Scotland Tenders (PCS-T) system.

The procurement process followed a two stage tendering procedure. At the first stage, tender European Single Procurement Document (ESPD) responses were assessed against financial capability, technical/professional capability and business probity requirements. Bidders were required to pass this stage to be eligible for award. At the second stage of the process, the offers were evaluated against the following criteria and weightings.

Technical 30% Commercial 70% Within the technical section, bidders were required to evidence their knowledge and experience by responding to method statements which covered areas including; stock holding and supply chain, sustainability and community benefits. Bidders were also assessed in terms of their ability to provide same day delivery, vehicle identification facilities, product recall/safety procedures, service facilities and consignment/imprest stocking opportunities.

Within the commercial section, bidders were invited to offer on a lot by lot basis. Fixed pricing for 12 months was required for all lots. In addition to the 12 months fixed pricing, tenderers were asked to confirm if they are willing to offer a longer period of fixed pricing from the framework contract start date. Bidders were also invited to offer early settlement discount for payments received prior to 21 days from date of receipt of invoice.

# 4. Report on Offers Received

The tender document was downloaded by 67 organisations, with 37 tender responses received. A summary of all offers received is provided in Appendix 2.

Based on the criteria and scoring methodology set out in the tender document, a full evaluation of the compliant offers received was completed. Appendix 3 confirms the scoring achieved by each bidder.

#### 5. Recommendations

Based on the evaluation undertaken, and in line with the criteria and weightings set out above, it is recommended that a multi supplier framework agreement is awarded to 33 suppliers across the seven lots as outlined in Appendix 3.

These 33 recommended suppliers offer best value and represent a mix of small, medium and large organisations. The range of suppliers recommended provides coverage for all vehicle manufacturers and competitive options for all participating councils as well as offering a degree of choice and capacity. Furthermore, the increase in recommended suppliers for this framework, delivers on a key objective of increasing the suppliers available to provide parts for specialists vehicles.

#### 6. Benefits

#### Savings

Scotland Excel has conducted a benchmarking exercise comparing current prices paid with the prices submitted against the new framework. It was agreed with the UIG that benchmarking would only be carried out on lot 1 (parts for light & heavy vehicles) as this covered the majority of spend from the framework. The benchmarking exercise took a sample vehicle for each manufacturer and compared a representative basket of parts for each manufacturer against the 'MEAT' (Most Economically Advantageous Tenderer) submitted prices received for the renewal framework. The result of this benchmarking is listed in Appendix 1. The projected average saving across all councils is 4.6%, which equates to an estimated total saving of approximately £306k per annum. The projected savings per council range from 0.8% to 9.6%. The variance reported is caused by a few areas mainly; a) the varied fleets

operated between councils and b) the age of fleet vehicles and the varying percentage splits of buying OEM (Original Equipment Manufacturer) parts or Matching Quality aftermarket parts between councils. It would be anticipated that the reported saving figures are conservative and by leveraging the very competitive pricing option of utilising matching quality aftermarket parts in preference to OEM options, further additional savings could be realised.

It is worth noting that councils' fleet consists of more than 40 manufacturers and over 15,000 individual vehicles, of variable models and ages, all requiring a differing profile of spare part types. This framework is looking to provide maximum coverage for these differing fleets.

### **Price Stability**

In addition to the mandatory 12 months fixed pricing periods for all lots, 20 of the recommended suppliers have offered further fixed pricing periods of between 6 months and the lifetime of the framework.

## **Sustainable Procurement Benefits**

Within the technical section of the tender, the sustainability method statement assessed suppliers in relation to their corporate approach to sustainability and how they promote recycle, reuse and reduce initiatives to minimise the impact of their supply chain on the environment. A range of sustainable measures were outlined by suppliers including;

- Reusing packaging
- Using biodegradable packaging materials
- Recycling of all general waste, waste fuel, oils and oil filters
- Uplifting old batteries from customers for collection direct to the manufacturer for recycling
- Adoption of the latest model delivery vehicles with Euro 5/6 engines
- Limiting delivery vehicles to 60 miles per hour in order to reduce fuel consumption

Tenderers were also asked to detail and demonstrate their commitment to providing community benefits initiatives within council areas with specific reference to this framework. These commitments will be further discussed during framework mobilisation activities and reported through ongoing contract management returns. Results reported on community benefits will be disseminated to councils on a six monthly basis. A range of community benefits were offered by bidders including:

- Recruitment of apprentices
- · Recruitment of new members of staff
- Employability workshops
- Sponsorship of local sports teams or community events
- Work experience placements
- Donation of product vouchers to support apprentices
- Weekly and monthly work experience placements to pupils or Council apprentices
- Donation of materials and/or labour to support community projects

### Fair Work Practices including the Living Wage

Tenderers were asked a question on their approach to fair work practices and payment of the Living Wage to their workforce. Of the 33 recommended bidders:

- 8 are an accredited Living Wage Employer
- 7 have committed gaining accreditation over the initial two year period of the Framework Contract
- 14 are not an accredited Living Wage Employer but pay the Living Wage to all employees (except volunteers, apprentices and interns)
- 2 are not an accredited Living Wage Employer and do not currently pay
  the Living Wage to all employees (except volunteers, apprentices and
  interns) but commit to paying the Living Wage to all employees (except
  volunteers, apprentices and interns) within the initial two year period of
  the Framework Contract
- 2 are not an accredited Living Wage Employer and do not currently pay the Living Wage to all employees.

Scotland Excel includes monitoring Fair Work Practices and Living Wage within its contract and supplier management programme and will work with all awarded suppliers who have not yet secured accreditation by the Living Wage Foundation to encourage them to achieve this in the near future.

### 7. Contract Mobilisation and Management

Each supplier will be invited to a mobilisation meeting to outline the operation of the framework, roles and responsibilities, management information requirements and community benefits commitments. Both suppliers and participating members will be issued with a mobilisation pack containing all required details to launch the framework.

In accordance with Scotland Excel's established contract and supplier management programme, this framework has been classified as a level 2 arrangement in terms of both risk and spend requiring annual supplier and user group reviews as appropriate.

#### 8. Summary

This framework for the supply and delivery of vehicle parts aims to maximise collaboration, facilitate the procurement of a vast variation and volume of vehicle spare parts, promote added value and deliver best value. A range of benefits can be reported in relation to savings, price stability and community benefits.

The Executive Sub Committee is requested to approve the recommendation to award this framework agreement as detailed in Appendix 3.
