**To: Executive Sub-Committee**

**On: 16 September 2022**

**Report by:**  
**Chief Executive of Scotland Excel**  
**Update on the Contract Delivery Plan**

### **1. Introduction**

This report provides a progress update on the 2022/ 2023 contract delivery plan.

### **2. Progress to Date**

Appendices 1 – 4 of this report on the 2022/ 2023 Contract Delivery Plan detail new framework developments and renewals, framework extensions and frameworks with ongoing contract management activity.

There are 72 current frameworks in the Scotland Excel contract portfolio, with 3 further frameworks to be developed and added. 26 of these frameworks are to be renewed before 30 June 2023 (Appendix 1).

A further 23 of the frameworks on the current portfolio have extension options that are available to be exercised in 2022/ 2023, with 19 of these extensions already being approved.

The estimated forecast value of the Scotland Excel framework portfolio by 31 March 2023 will be approximately £2Billion.

Overall, efficiencies delivered to date in 2022/2023 are 2.09%, which is within the forecast range.

A summary of spend and forecast savings per council between January 2021 and December 2021 can be found in Appendix 5, with an average forecast efficiency of c.1.84%.

In addition to the activity detailed in Appendices 1 - 4, Scotland Excel is exploring the benefits of further collaborative procurement across high spend, critical service areas in the construction, corporate, ICT and social care teams.

### **Social Care**

Following the most recent re-opening of the flexible framework for care and support services, 20 new providers (24 services) have successfully joined the framework. For the newly awarded providers, two framework mobilisation sessions were held on 26 May and 30 May. In addition, two refresher sessions were held with current framework providers on 24 and 28 June. Commissioners have been informed that the newly appointed providers were awarded to the framework on 22 April 2022 and one single provider from 29 April 2022 following further checks.

The tender for the 3rd generation framework for Social Care Agency Workers was published on 24 May 2022. Following extended consultation with the User Intelligence Group, the framework will retain many elements of the current arrangement with amendments to the structure of the lots, care roles, simplifying ordering procedures and modification of the evaluation methodology. The tender closed on 30 June 2022 and is at the final stages of the evaluation process with the new framework anticipated to be in place for 1 November 2022.

Phase 1 of the Residential Rehabilitation Project market research and analysis is currently in progress to consider commissioning options for residential rehabilitation services. This work has been commissioned by the Scottish Government. Scotland Excel has requested information from commissioners about contracting and commissioning arrangements and future options via a questionnaire to Alcohol and Drug Partnerships (ADPs) and more detailed template to Health and Social Care Partnership Contracts and Commissioning teams.

The approach was modified to reduce the amount of information requested from ADPs on advice from the Scottish Government. Letters to Integrated Joint Boards, Chief Officers and Heads of Council Procurement have been sent to advise them of the work. Spend per ADP is available from publicly available data, but not spend or rates per provider. The spend information requested is required to identify options and will be reviewed following returns from commissioners and providers.

A Prior Information Notice and questionnaire for providers/services was issued and links published on Twitter and LinkedIn, as well as direct communications to known providers. The closing date for both surveys was 22 July 2022, this has been extended to allow follow up with ADPs, commissioners and providers.

The redesign process of the National Care Home Contract (NCHC) has now started. Review of the redesign strategy will continue in order to encapsulate guidance and legislation that has a direct impact on the contract. As expected, when working across multiple agencies and individual groups, there has been a “settling in” period for the process which may have an impact on the projected timeline of March 2023 for completion. This will continue to be monitored and assessed by Scotland Excel.

Scotland Excel has been consulting with key stakeholders in relation to future plans for the national framework for Children’s Residential Care & Education. The renewal tender was published in May this year and the new framework is scheduled to go live in October 2022. The renewal framework reflects the feedback received from providers and councils to create a streamlined process that reduces the administrative burden on providers whilst increasing the information sharing and transparency around services and fees.

The renewal framework also features continuing care services, which reflects the policy direction of supporting children and young people in placements over a longer time period, where it is appropriate to do so.

## **Construction, Transport and Environmental Services**

Since the last update on the Contract Delivery Plan, a framework focused on development of Scotland’s Electric Vehicle Charging Infrastructure has been awarded. Mobilisation work is underway to ensure users of the framework are equipped with the appropriate support to enable award of works packages. The objective of the framework is to support the elimination of petrol and diesel light

commercial vehicles in Scotland's public sector fleet by 2025 in line with the Scottish Government Climate Change Plans.

Scotland Excel awarded the second-generation Energy Efficiency Contractors Framework earlier this year which provides members with an effective method of upgrading existing housing stock. A launch event for the framework took place at Dynamic Earth on 26 May. The event was well attended by Scotland Excel member organisations and suppliers. The agenda introduced stakeholders to policy developers, those leading on green energy skills development and those working to bring innovation to this marketplace.

By linking together those using the framework with leads in each of these areas, the potential for fast paced retrofitting of residential and corporate properties is increased. This framework has sustainability at its core and will underpin the Scottish Government's drive for Net Zero by 2045.

Several frameworks are currently under development:

*Construction Materials* merges five established frameworks, using the rich pool of data on buying habits compiled over more than 10 years of facilitating the sourcing of materials. This knowledge of the market, buying habits and supplier services means we are now able to simplify the sourcing of material by offering a consolidated approach. This framework will be ready for use in Spring 2023.

*Property Maintenance and Refurbishment* will focus on the provision of services for the management of both domestic and non-domestic properties. This is a first-generation framework and is being developed through consultation with our members to ensure it covers a broad range of requirements. The contract owner has also worked with the national Supplier Development Programme to ensure the business community are well informed of the opportunities this framework presents. Training for businesses has been offered to ensure any companies unfamiliar with public contracting have the appropriate information to access the tender documents when issued.

Preparation for a revised approach to frameworks for Grounds Maintenance supplies and the Purchase of Light and Heavy Plant are now underway. Strategies to improve how these frameworks are structured to reflect operational use will be explored.

There are five frameworks which are nearing the end of the procurement process and preparations for mobilising suppliers and implementing contracts within member organisations are taking place. The recommendations for award to the Outdoor Play and Sports Equipment, Salt for Winter Maintenance and Roadstone frameworks were approved at the August Executive Sub-committee and award procedures are underway. Building Construction Consultancy and Street Lighting Materials are under evaluation and recommendations will be submitted to upcoming meetings of the Executive Sub Committee for approval to award. All five frameworks will be available for use later this year.

The activity under the New Build Residential Construction Framework has continued to grow as our members have renewed their focus on new build housing projects. Early discussions on the needs of the next generation of this framework are underway. Members were issued a survey in May 2022 and the results are now being used to inform the lotting structure for the next generation, due to be available from August 2023.

## **Corporate, ICT and Operational Supplies and Services**

Food price inflation over recent months remains an area of concern. Food prices in the UK continue to rise, with food price inflation reaching 9.8% in the 12 months to June. Overall inflation has reached another 40 year high, with the latest Office of National Statistics (ONS) figures showing overall inflation of 9.4% in the 12 months to June 2022- largely driven by rising fuel and food costs. Economists estimate that overall inflation will continue to rise, with some predicting a 11% rise this autumn due to the Ukraine war and economic sanctions on Russia.

Compared to the annual increase in May, June figures shows that prices have risen across the food categories (except sugar and confectionery), with the highest increase seen in milk, cheese and eggs, meat and vegetables. The Food and Agriculture Organisation of the United Nations published figures for June 2022; the FAO Food Price Index, shows a slight decline since April 2022, although this is still 23% above its value a year ago. While international meat and dairy prices are still increasing, these increases have been offset by decreasing international prices of vegetable oils, cereals and sugars.

The current Scotland Excel Framework for Fresh Meats, Cooked Meats and Fresh Fish was due to expire in September 2022. However due to various reasons including the introduction of the Good Food Nation Bill and current volatile pricing in food, a 6-month extension to this framework has been approved under Regulation 72. By delaying this tender Scotland Excel will be better able to develop strategy around the Good Food Nation Plans our members are required to create. Work is now underway to develop the strategy for this retender.

Work is also under way on the retender of Janitorial Products which is due to go live in March 2023. A prior information notice has been issued to the market through Public Contracts Scotland and planning is under way to hold user information groups with our members.

Prior information notices have been issued through Public Contracts Scotland for various upcoming tenders including First Aid Materials, Bottled Gas, Fire Safety Equipment and Commercial Catering Equipment.

Currently the ICT and Education team is developing the tender documents for the following contracts: National Shared Digital ARC, Technology Enabled Care and Fire Safety Equipment with the intention that these contracts are approved for award by the December committee.

The team is engaged in several projects with our partner the Scottish Local Government Digital Office these projects include Office 365, Security Operation Centre and the Scottish Technology Asset Management Platform (STAMP) which is a central repository of data on ICT and digital solutions being used across local government.

The team regularly attends and provides procurement input for the following boards – Digital Assurance, Public Sector Innovation, the Department for Education four nations roundtable on commercial themes in schools and Telecare Steering. We are also currently developing a proposal to assist the Improvement Service with some of its key procurements for 2023.

### **3. Conclusion**

Members are invited to note the progress made to date.
