## **Contract Delivery Plan Update**

#### 1. Introduction

This report provides a progress update on the 2021/2022 contract delivery plan.

#### 2. Progress to Date

As detailed in Appendices 1 - 4, the 2021/2022 contract delivery plan details new framework developments and renewals, framework extensions and frameworks with ongoing contract management only.

There are 74 current frameworks in the Scotland Excel contract portfolio, with 4 further new frameworks to be added and 25 of these frameworks to be renewed before 31 December 2022 (Appendix 1).

A further 16 of the frameworks on the current portfolio have extension options that are likely to be exercised in 2021/2022, with 5 of these extensions already approved.

The estimated forecast value of the Scotland Excel framework portfolio by 31 March 2022 will be approximately £2Billion.

Overall, efficiencies delivered to date in 2021/2022 are 3.07%, which is slightly above the forecast range.

A summary of spend and forecast savings per council between July 2020 and June 2021 can be found in appendix 5, with an average forecast efficiency of c.1.72%.

In addition to the activity detailed in Appendices 1 - 4, Scotland Excel is exploring the benefits of further collaborative procurement across high spend, critical service areas in the construction, corporate, ICT and social care teams.

The Care and Support Flexible Framework went live on 1 April 2020. The framework has currently 119 providers offering over 460 Services.

There has been a steady increase in uptake since the framework start date with 13 councils having confirmed they are utilising the framework. Indicative baseline data submitted by 10 councils projected to the end of the financial year (31 March 2022 indicates support packages for around 4,700 service users will be in place by the end of March 2022.

The framework was re-opened in October enabling new providers to apply to join the framework from April 2022.

The Flexible Framework Agreement for the provision of Social Care Agency Workers is due to expire on 31st July 2022. This framework currently covers the provision of agency staff in social care roles, social work and other professional roles and ancillary support roles. The third-generation framework is anticipated to go live on the 1st August 2022. Consultation to help inform the strategy development work is due to begin shortly with sessions for suppliers and purchasers scheduled for December 2021.

Negotiations in relation to the National Care Home Contract (NCHC) rates for 2022/23 began in early November. An interim increase is required to take effect from 1st December to reflect Scottish Government's workforce increase as part of winter planning measures. Implementation of Scottish Government's adult annual social care increase will need to be considered along with detailed discussion on cost pressures faced by the sector.

Scotland Excel has been consulting with key stakeholders in relation to future plans for the national framework for Children's Residential Care & Education. This work seeks to understand the potential impact on the sector of policy change coming from the work of The Promise and to determine how best to reflect this in the national arrangement.

The activity under the New Build Residential Construction Framework has continued to grow as our members have renewed their activity on new build housing projects. To date, the framework has 14 awarded projects which together are delivering over 550 homes and also a care facility. Twelve projects are live on site and are already delivering substantial local benefits, with over £32 million being awarded to local contractors and subcontractors. It is anticipated that in total 22 projects with a combined value of c£230m will be awarded through the framework by the end of 2021/22.

Supply Chain disruption is having a significant impact on construction materials. Scotland Excel is deploying a range of measures to manage the impact on council members. Part of that strategy includes consolidating the number of frameworks associated with these product groupings. By doing this it will simplify the contract management arrangements for both the supply base and the operational teams using the framework. Building and Timber Materials, Plumbing and Heating Materials, Electrical Materials, Trades Materials and Power Tools will be combined into a multi-lotted framework which will mean fewer tender responses for the supply market and a simplified call off for end users. As part of this rationalisation Gas Boiler Maintenance services will also be aligned with maintenance services across a wider scope. Regulation 72 will be used to harmonize the end dates of the affected frameworks.

Scotland Excel has developed a new process for undertaking opportunity assessments for OSS (Operational Supplies and Services) contracts to understand how these frameworks have operated, for example their participation and spend profile. These opportunity assessments will be used to inform discussions with councils as to whether it is viable to renew each of these frameworks or, for example, if their scope should be changed significantly. This will ensure that the contracts within the OSS team continue to meet council requirements.

Supply Chain disruption also continue to have a major impact on supply across the Scotland Excel food portfolio. Suppliers continue to be impacted by the industry-wide, global supply chain challenges. The primary challenge for suppliers is a shortage of staff. When combined with knock-on impacts to production and haulage capacity, this is affecting the ability of many of our suppliers to deliver to members on time and in full.

Multiple categories and product types are affected, from farm to fork, whether sourced from the UK, the EU or from further afield. These challenges have been ongoing since the market reopened summer 2021, and are forecast to continue until beyond Christmas, and even further into 2022 in some parts of the country. Scotland Excel will continue to work closely with suppliers and members to ensure communication is managed during this uncertain period.

The next generation of the Frozen Foods framework is currently under evaluation and will be presented to the Executive Sub Committee in January 2022. Scotland Excel will then begin work on the development of the renewal for Fresh Meats, Cooked Meats and Fresh Fish.

A new category manager has been appointed to oversee the management of the ICT and digital category and to lead the development of sourcing strategies to deliver value for money and improved services for our members. The category manager will work with strategic partners such as the Digital Office for product/service development, research, innovation and working collaboratively to improve digital access across Scotland.

#### 3. Conclusion

Members are invited to note the progress made to date.
